To Parents/Guardians:

Your child may have been exposed to **Pneumonia** at school.

This is spread by airborne or direct exposure to respiratory droplets from a person who is infected or carrying the bacteria.

Please be alert to cold symptoms in your child that worsen. Symptoms generally include:

- An abrupt onset of fever and shaking or chills.
- Headache
- Cough
- Chest pain
- Disorientation
- Shortness of breath
- Weakness and
- Occasionally a stiff neck.

If any of the above symptoms should develop, please contact your healthcare provider for treatment.

Please notify the School Office at _____ if your child becomes ill with chicken pox or if you have any questions or concerns. Further information can be found on www.mayoclinic.com.

Sincerely,
