Good Night Sleep Tight
Don't let the
BED BUGS
bite!

Bed Bug History

- Documented since early 1700's in North America
- Sailboats were infested when returning from Europe

No Worries!

- Concern dropped off in the 20th century
- After WW II, used insecticides such as DDT
- Household cleanliness improved
- Improved regulations on used furniture market

They're BACK!

- International travel and commerce
- Hitchhiker in luggage, clothing, bedding furniture
- Can infest planes, ships, trains and buses.

- Lack of control since there hasn't been a problem
- Can't use DDT
- Use of more baits rather than insecticides for ant and cockroach control.

- 2000 Olympics in Sydney, Australia
- 95% of hotels were affected

- UK
- Poor economy, buying second hand clothes, furniture, ashamed

- Bed Bug (*cimex lectularius*)
- Northern Temperate Climates of North America, Europe, and Central Asia

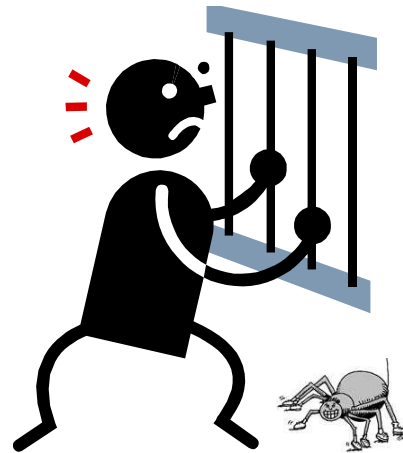

- Tropical Bed Bug (*Cimex hemipterus*)
- Africa, Asia and tropics of North America and South America.
- This ones loves Florida too!

Most Frequently Found

- High rate of occupant turnover dwellings such as:

- hotels
- motels
- dormitories
- shelters
- apartment complexes
- tenements
- prisons.

I SEE you!

- Small, flat, wingless reddish brown adults
- translucent when immature
- eggs are white
- Size of an apple seed more or less

Nocturnal Blood Suckers!

- Feed on the blood of humans and animals
- More active 1 hour before dawn
- Not known to transmit disease

“There ain’t no bugs on me, oh
there ain’t no bugs on me.
There may be bugs on some
of
you mugs but there ain’t no
bugs on me!”

“On the road again!”

- Live within 8 feet of where people sleep
- Furniture, fabrics, electronic devices
- Can travel 100 feet in one night

Hide and Seek

- During the day, hide in box springs, bed frames, headboards, dresser tables, cracks or crevices, behind wallpaper, under any clutter or objects around a bed.
- They like CLEAN places as well as DIRTY ones.

Bite Marks

- Bites are painless
- Inject anesthetic and anticoagulant
- First, white welt
- Then ,red, swollen, itchy, irritated
- Rows of three welts are characteristic
- **Breakfast, Lunch, Dinner!**

Tell-tale Signs

- Exoskeletons after bugs molt or get crushed
- Sweet musty odor
- Rusty-colored blood spots from their blood-filled fecal material on mattress or furniture.

Control Measures

- Don't try to “do it yourself” if you have an infestation
 - Call a professional!

Some things you can do yourself

- Vacuum mattress regularly
- Use hot water to launder bedding
- Put bedding in clothes dryer for 20 minutes
- Stiff brush to scrub mattress to dislodge bugs and eggs
- Steam cleaning is not recommended
 - (moisture causes mildew and house mites)
- Put plastic zipper cover over mattress
 - (takes a long time)
- Insecticides can be dangerous . Don't use.

Prevention

- Carefully inspect clothing and baggage after traveling
- Inspect second hand furniture
- Caulk cracks and crevices on exteriors
- (keeps hosts like birds, bats and rodents out)

THE END

- **YOU CAN STOP STRATCHING NOW!**
